## Line Spacing Adjustments

### Pre-Designed Templates

Avery pre-designed templates created for Microsoft Word 2003, XP, 2002, and 2000 located in the Avery Wizard, may have line spacing issues when opened in Word 2007.

When a pre-designed template is opened in Word 2007, the line spacing setting is updated to the default setting in Word. This is incorrect for the layout of the template design.

Use the following steps to reset the line spacing setting to correct the pre-designed template layout:

1. In Word 2007, select the **Home** tab on the Ribbon.
2. In the **Paragraph** category, click the down arrow on the **Line Spacing** icon.
3. Select **Line Spacing Options**.
4. Change the **Line spacing** setting to **At least** and the **At** setting to **0** pt.

If you need further assistance, please call Avery Software Support at 888-835-8379.
